Logging into AppalNET for the First Time for Students:

- 1) Click the 'AppalNET' link on the University Homepage, or point a java-enabled browser to <http://appalnet.appstate.edu>
- 2) Notice the "Having problems logging in?" menu, which provides links to the Password Change Form, and information about supported browsers for AppalNET.
- 3) Log in by entering your official ASU User ID in the "User Name:" field. Most likely, your password will have been reset to your Student ID number. Enter your Student ID number into the "Password:" field, without the dashes. You may then be prompted to choose a new password after you log in. Follow the prompts to choose an appropriate new password. **NOTE:** AppalNET is a case-sensitive system! Please be sure to note the case(s) you use when you create your password.
- 4) If you are unable to log into AppalNET successfully, follow the link to the "Password Change Form" listed under the "Having problems logging in?" menu. This will allow you to set/change/synchronize your AppalNET password. If this effort fails, please call Tech Support at (828) 262-6266 to speak with a technical support specialist.
